

Installation of Single Sided Snap Frame

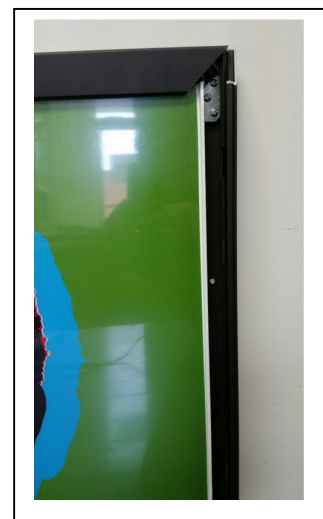

The package contains:

- 1 assembled snap frame light box, including a clear acrylic cover
- 1 set of "Z" clips (optional)
- 1 set of hanging hardware (optional)
- 1 power supply & cord

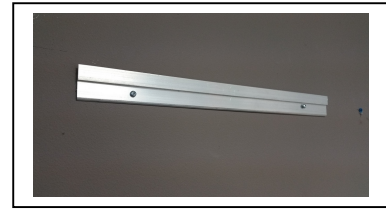

1. A single sided snap frame light box has LEDs attached to the frame on the two longer sides.

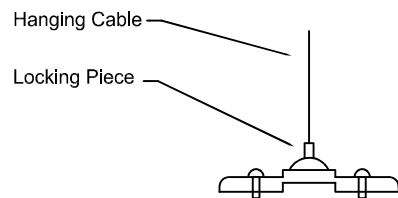

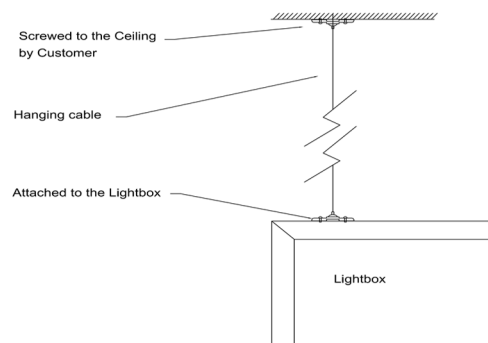

2. The frame can be screwed to the wall, using the holes inside the frame. Using a level, make sure the frame is leveled, Then mark the holes on the wall, drill holes on the wall, and use plastic plugs and #8 or #10 screws to attach the frame to the wall.

3. Alternatively, a set of “Z” clips can be used to hang the frame. The “Z” clip set comes in two parts: one is attached to the light box, and the other is screwed to the wall.

4. If ordered this product with hanging hardware, follow the instruction below:

1. To install, push the Hanging Cable into the Locking Piece on the lightbox and on the ceiling
2. To release the Hanging Cable, push the Locking Piece in, and pull the Hanging Cable out
3. To level the lightbox, push the Hanging Cable in, or release it, on both sides till the desired level is achieved

5. Plug in the female connector on the light box to the male connector on the power supply.
